## 1. Introduction

This specification provides the definition of the Multiple debit advice message (DEBMUL) to be used in Electronic Data Interchange (EDI) between trading partners involved in administration, commerce and transport.

### 1.1. Scope

### 1.1.1. Functional Definition

A DEBMUL message is sent by an Account Servicing Financial Institution to the Account Owner or to a third party, which has agreed bilaterally in advance, that its account (s) has been or will be debited for specified amount (s) on the date (s) indicated, in settlement of the referenced business transaction(s).

### 1.1.2. Field of Application

The Multiple debit advice message may be used for both national and international trade. It is based on universal commercial practice and is not dependent on the type of business or industry.

### 1.1.3. Principles

- A DEBMUL may cover the financial settlement of one or more commercial trade transactions, such as invoices, credit notes, debit notes, etc. It is not intended for use in securities trading.
- Several debit accounts, value dates, entry dates and currencies may be specified.

### 1.3. Data Segment Clarification

The following semantic principles apply to the message and are intended to facilitate the understanding and implementation of the message:
The Multiple Debit Advice message is structured in three levels: A, B and C.

- Level A (Segments UNH, BGM, DTM and BUS (not used), Segment Groups 1, 2, 3 and 28 and Segments CNT and UNT) contains general data related to the whole message.
- Level B (Segment groups 4 to 9 ) is based on the following rules: Level B contains data which applies to all the dependent C levels, such as,
- Same area Code: When the BUS segment is used, domestic and international items should not be mixed in the same sequence of B and C levels.
- Same currency and same account: The items to be grouped must refer to the same account. The currency to be booked must be the same as that of the account.
- Same value date: The items must have the same value date.
- Same entry date: The items must be booked on the same day.
- Same bank operation code: The items must bear the same bank operation code

Remark: If, for the same receiver, one of these 5 basic pieces of information changes, a new level B is required.

- Level C (Segment groups 10 to 27) contains the individual transactions, which are related to the data stored on level B.

The structure of the message is designed to allow several B and C levels, each level B being followed by one or several C levels.
Where a choice of code or text is given only the code element should be used wherever possible.

## 3. Segment Layout

### 3.1. Introduction

This section describes each segment of the UN/EDIFACT message DEBMUL.
Each segment is presented in a separate table and in the sequence in which they appear in the message.
The upper half of each table provides information about the segment or segment group concerned, the lower part of the table describes the data elements (composite and simple).

Each table is structured in three vertical blocks: UN/EDIFACT Directory 96.A, D6 and an empty block:

### 3.1.1. UN/EDIFACT Directory 96.A Block

The left third of the table provides information extracted from the original UN/EDIFACT Directory 96.A.
In the first line of this block, the segment or segment group tag is followed by the maximum number of occurrences.
The second line contains the (M)andatory / (C)onditional indicator at segment level, according to the UN/EDIFACT Directory 96.A
In the lower half of the table, the data element tag (composite or simple) and full name are followed by the corresponding (M)andatory /
(C)onditional indicators and the format.

### 3.1.2. D6 Description Block

This block presents the recommendations of D6 (EWG sub-working group Finance).
Both for segment level and for date element level (simple and composite), the following status/sub-status are defined:

| M | MANDATORY | The entity is mandatory and must be sent (according to directory, unchanged) |
| :--- | :--- | :--- |
| R | REQUIRED | The entity is required and must be sent |
| D | DEPENDENT | The entity must be sent in certain conditions, as defined by the relevant explanatory note |

O OPTIONAL The entity is optional and may be sent at the discretion of the user
N NOT USED The entity is not used and should be omitted. Any data placed in an element marked with N will be ignored.
At data element level:

- The first column indicates the status as defined above (with the options $\mathrm{M}, \mathrm{R}, \mathrm{D}, \mathrm{O}, \mathrm{N}$ );
- The second column includes information affecting the code values as follows:

| $*$ | Restricted codelist | Code values preceded by an asterisk $\left({ }^{*}\right)$ are the only codes available for use in the given context |
| :---: | :--- | :--- |
| $<$ blank $>$ | Open codelist | Code values not preceded by an asterisk $\left({ }^{*}\right)$ are not restricted (they are open). <br> The available codes are listed in the codelist of the corresponding UN/EDIFACT directory. |
| $* \mathrm{R}$ | Required code in a <br> restricted list | Codes preceded by an " R " are required and must occur in one repetition of the corresponding segment if <br> used. |
| R | Required code in an <br> open list | Codes preceded by an " R " are required and must occur in one repetition of the corresponding segment if <br> used. |

- The third column provides additional comments and descriptions.

Note that if a segment group/segment/composite data element is flagged as " N ", all data elements within that segment group/segment/composite data element will have blank status indicators.

### 3.1.3. CRG Description Block

The last block of the table describes the preferred use of the message for a group of multinational companies constituting the "Corporate Reference Group" (CRG). The CRG is established as a forum for discussions of standardisation issues. The members of the group are predominantly companies with activities in several countries and a large resource base.

## 4. History of changes

This DEBMUL MIG, version 1.1 of August 2000 contains the following changes, as compared to the previous version:

- Chapter 1 - Introduction New section.
- Chapter 2 - Message Layout New section.
- Chapter 3 - Segment Layout Addition of section "Introduction".
- Chapter 3.2. - Segment Description Layout of table altered, Consistency of descriptions improved.
- Chapter 4 - History of changes New section.

Changes from version 1v1 to 1v2 of November 2000:

- Chapter 3.2 - SG07

Description of Option 3 changed: SG17 is used. The single amounts in SG17 have to be summed up into SG07 when charges/allowances are not included in the transaction. This option only uses code 7 in DE 4471

- Chapter 3.2 - SG08 and SG18 ALC-C552 changed from "R" to "O"
- Chapter 3.2 - SG09, SG13 and SG19 Description in CUX segments improved (usage of currency rate base)
- Chapter 3.2 - SG15

INP-C849 changed from " $R$ " to " O "

- Chapter 3.2
